

Time Log

Task	Estimated time	Actual time
1.Time log.Estimate	30m	30m
2.Read the book	10h	5h
3.Crate use case diagram	3h	2h
4.Create stata machine diagram	2h	5h
5.Create State machine	4h	4:30 h
6. Type Hangman code	15h	23h
7. Create class diagram	2h	4h

Iteration 2

The time log for the second iteration is better than the first one , the estimated time is close to the actual , there are only some tasks which were so hard to understand , a bit vague to understand.
